

Clair Stack application diagram
Shows the composition of the Clair Stack in terms of individually executable applications and their interaction.
Does not show deployment issues like clustering, replication, failover, etc.

- Arrows show the calling direction.
- Cardinalities are written in UML-style, with implicit unit cardinality.
- Grey boxes mark existing systems operated by third parties.
- Blue boxes are the applications that make up the Clair Stack.
- Colored arrows show the flow of related synchronous calls.
- The dashed boxes show the system boundaries.
